Ballistic Testing Services

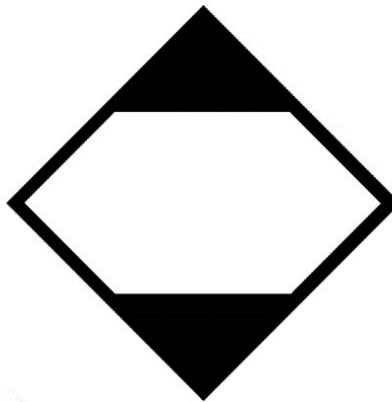

Check your loads for stability and consistency with our state-of-the-art Oehler M-35 P Model 57 Chronograph for velocity measured three feet from the muzzle. Pressure is measured with our Piezoelectric transducer system. Test results will include velocity, pressure average, extreme variation, and standard deviation of your 5-shot string. List components used (Hull, Primer, Powder, Wad, Shot). **We do not test Brass Shotshells. We only test reloaded ammunition; we do not test factory ammunition.**

Please supply 6 shells; one will be dismantled to verify components. Please supply your personal information including name, address, phone & email. Results are typically available within 2 weeks and can be mailed or emailed. Always follow reliable loading data. The cost is \$53.10 per 5 shot string OR \$37.17 per 5 shot string if 2 or more shot strings are tested. The above pricing includes 6.2% South Dakota sales tax.

Ballistic Testing is for Smokeless powder only, NO BLACK POWDER.

Acceptable payments:

- (1) Credit Card – Visa, Mastercard, Discover, American Express
- (2) Money Order
- (3) Personal Check (cashed before results released)

Ammunition sent in for Ballistic testing must be shipped UPS or Fed-Ex ground and marked with the label above on the outside of the box. You can download and print this label at: <https://www.precisionreloading.com/docs/uploads/Limited-Quantity-Label-Download.pdf>

*** Loads cannot be shipped via USPS mail.**
