

SHOOTING GEAR

KICK EEZ Recoil Pads
 KICK EEZ™ pads are made from soft Sorbothane® which actually absorbs the kick and allows recoil-sensitive shooters to shoot in comfort. 500 Series Magnum pads have ribbed face. 400 Series Trap pads have curved ribbed face. 300 Series All Purpose pads are available in 3 thicknesses with leather-grained face. 200 Series Sporting Clay pads have the heel contoured at approximately 45° to allow easier shouldering from the “low gun” position. The 801 recoil pad has a special shape to fit difficult stocks. The Rocker is designed to allow more consistent mounting of the firearm to the shoulder pocket area. The tapered toe prevents digging into the shooter’s shoulder. **NOTE:** All measurements are approximate. For proper fit, gunsmith installation is required.

Jones Stock Adjuster
 The Jones Black Anodized Stock Adjuster is only 1/4" thick - Steel Threads Drilled and tapped for KICK EEZ™ and many other recoil pads. Fully adjustable left, right, down and diagonally 22° left or right. Can be installed by anyone who can grind a recoil pad. A true quality product for quality shooters. Pad not Included.
 GNJSA22 \$57.99

100 Straight Products Pad Adjuster
 The final word in pad adjusters! Adjustments are made through a hole in the pad with a 5/32" Allen wrench. Pad not Included.

Specifications:
 Total Thickness .290", Length: 5-3/4", Width 2"
Adjustment Range: 1" Up-Down, 1/2" Left-Right, 90° Diagonal Left-Right.
 GN100STPA \$79.99

100 Straight Products Pad Popper Quick Removal System
 This unique Recoil Pad Quick Removal System replaces worn out screw holes with heat treated alloy steel, permanent machine thread inserts. Recoil pad screws can be removed countless times - you can slip recoil pads on and off to use different styles. Quickly add spacers for correct length of pull.
 GNKT78 \$18.99

KICK EEZ™ Sorbothane Pre-fit Recoil Pads
 KICK EEZ™ has a pre-fit sorbothane recoil pad to fit most models and manufacturers. KICK EEZ® Sorbothane® Pre-Fit Recoil Pads are designed to install easily on a wide variety of rifles and shotguns. Because manufacturers modify their stock dimensions, templates are provided to help match the appropriate KICK EEZ® pad to a specific gun stock butt. Start by removing the current plate or pad from the stock butt. Then place the current plate, pad or gun stock over each template until a proper match is found. The template can be cut out and placed on gun stock to determine screw hole location. The model number of the chosen KICK EEZ® Recoil Pad is located on each template for easy purchase or ordering. Complete installation instructions can be found in each package.
Templates can be found at www.Kickeezproducts.com or call for a free copy.

Beartooth Recoil Pad Kit 2.0
 Beartooth's Recoil Pad Kit 2.0 is by far the best way to eliminate hard-hitting recoil and properly fit your gun. The stretchy slip-on neoprene sleeve fits nearly all gunstock sizes and works excellent with both shotguns and rifles. Simply insert foam into sleeve and pull on - no more gunsmithing. Rubber backing keeps the hi-density inserts in place - which are constructed of closed cell foam, known for its exceptional high energy absorption properties. Each RPK 2.0 includes: (1) neoprene cover and (4) sizes of pads for versatility and adjustment.

Carlson's

These chokes are made of 17-4 heat treated stainless steel. Steel or lead shot may be used in these choke tubes. Steel shot larger than #BB should not be used in any choke tighter than modified, BB and smaller size steel shot may be used through full choke constriction. Lead, Copperplated, Nickel, Hevi-Shot, or Bismuth may be used in these choke tubes.

Extended Turkey Choke Tubes These choke tubes produce extra tight patterns with copperplated and buffered lead turkey shotshells. Extend approximately 1" from the end of the barrel. Matte blue finish. Steel Shot not recommended.

SHOOTING GEAR

Carlson's Extended Sporting Clays Choke Tubes

Sporting Clays choke tubes are made from 17-4 stainless and precision machined to produce a choke tube that patterns better than standard choke tubes. These choke tubes feature a 25% longer parallel section in the choke thus throwing more consistent patterns than conventional choke tubes. Each choke tube is knurled on the end to allow for quick and easy removal. Each choke tube has the constriction laser marked on the end for easy reference. Lead, Copperplated, Nickel, Hevi-Shot, Bismuth, Tungsten or Steel Shot may be used in these choke tubes. These choke tubes are backed by their lifetime warranty.

SHOOTING GEAR

Carlson's 12 Ga. Ported Extended Sporting Clays Chokes

Carlson's Ported Sporting Clays choke tubes reduces recoil and at the same time reducing muzzle jump making follow up shots quick and easy. Manufactured from 17-4 stainless steel and precision machined to produce a choke that patterns better, with less recoil than standard flush mount choke tubes. These chokes feature denser patterns with less flyers, in other words more pellets on the target. The extended portion of the choke tube allows for quick and easy removal and insertion. Lead, copperplated, nickel, hevi-shot™, bismuth and tungsten may be shot through these choke tubes. When using steel shot do not shoot steel larger than BB through any choke tighter than full. These choke tubes have a blue finish and carry their full lifetime warranty.

Carlson's

Carlson's 12 Ga. Ported Coyote Choke Tubes

For use with hevi-shot, bismuth and lead. This high performance choke tube has been specifically designed for the coyote hunter to deliver devastating downrange patterns upwards of 70 yards when shooting larger shot sizes. Produces very dense patterns when utilizing T and #4 Buck loads. Great for waterfowl and predator hunting. **Not for use with Steel Shot.**

Carlson's

Carlson's Rifled Choke Tubes

These precision Rifled Choke Tubes are manufactured from 304 high stress stainless steel. Each choke tube protrudes .625 to 1.3 inches from the end of the barrel depending upon which type of firearm the choke tube has been specially designed for. Each choke tube has a right hand rifle twist, which is 1 to 35. Each choke tube has a groove diameter of .730 of an inch in 12 ga. These choke tubes have a matte black finish and carry a lifetime warranty. If you're looking for improved accuracy from a smooth bore barrel these fine choke tubes will improve your groups. Works with slugs, rifled slugs and sabots.

Carlson's

Carlson's Black Cloud Choke Tubes

This extended tube is constructed of Titanium-coated steel. The Titanium coating helps the uniquely designed FliteControl Wad in the Black Cloud™ ammunition perform downrange with less build-up in the choke and allows the Flitestopper shot to do its job, thus increasing your take in the field. The Long Range model can be used with all steel shot sizes, except T & F, and with ammunition performing at velocities below 1500 fps. The Mid Range model can be used with all steel shot sizes, and with ammunition that exceeds 1500 fps. Black Cloud™ ammunition has been designed to be used with choke tubes that do not use porting or wad stopping devices. Backed by Carlson's lifetime warranty.

Carlson's

Carlson's 12 Ga. Ported Buckshot Choke Tubes

Carlson's Ported Buckshot choke tubes are designed to give you tight patterns downrange with 00 & 000 buckshot. This choke is ported to reduce recoil and muzzle jump that tend to go hand in hand with these large loads. Choke will extend about 1" out of the barrel and has a black finish. Can be used with lead, steel, and hevi-shot loads. **This choke cannot be used with any Steel Shot larger than BB or with any Steel Shot faster than 1550 FPS.**

Carlson's

Carlson's Creamator Waterfowl Choke Tubes

These chokes feature Carlson's Triple Shot Technology. TST is a series of three graduated rings in the parallel section of the choke that allow a more gradual transition from the shotgun bore to the final constriction. This conveys a host of benefits to the shooter, like reduced pellet deformation, a shortened shot string, and less flyers. You also get all the benefits of an extended choke tube. Additionally, the 25% longer parallel section encourages tighter and more dense patterns. They are offered in your choice of ported or non-porting configurations, with a matte black finish.
